Roger K. McFillin, Psy.D., ABPP

Clinical Psychologist, Author, and Podcast Host

Dr. Roger McFillin is a board-certified clinical psychologist with more than two decades of experience. His advocacy for informed consent and medical freedom around psychiatric diagnoses and drugs thrust him into the national spotlight. He was one of only two psychologists invited to participate in the FDA's expert panel on the risks of SSRIs during pregnancy, and his work has drawn fire from the pharmaceutical industry and the mainstream press. A spiritual awakening that began in 2020 shifted his understanding of reality and changed the way he practices. He co-hosts the Radically Genuine Podcast, ranked in the top 0.5% of podcasts globally, and is a bestselling writer on Substack.

About the Book

In *The Awakening They Cannot Medicate*, Dr. McFillin documents the series of miraculous events that shattered everything his training had taught him about the nature of reality. Integrating ancient spiritual wisdom with consciousness research and post-material science, he exposes the anti-human agenda behind the mental health industry and reveals how we recover our true power to heal.

Balboa Press, a division of Hay House, 2026
